INTRO

Seeking the position of Junior Backend Developer to leverage my Java, Spring Boot, and MySQL expertise, with testing skills in JUnit, Mockito, and Spring Boot Test. Solved 300+ algorithmic challenges on UVA, Codeforces, and HackerRank. Eager to learn and contribute to the company's projects and grow in a professional setting.

TECHNICAL PROFICIENCIES

Programming Language

Java, C++, C, JavaScript, PHP

Frameworks

Spring Framework, Hibernate, JPA

Testing

Spring Boot Test, JUnit, Mockito, Selenium, RestAssured

Databases

MySQL, PostgreSQL

Version Control

Git, GitHub

EDUCATION

Islamic University,

Bachelor Degree of Computer Science & Engineering
Kushtia, Bangladesh

CERTIFICATION & TRAINING

Java with Spring and Spring Boot — Pondit

Spring Boot 3, Spring 6 & Hibernate for Beginners — Udemy

Spring Boot Unit Testing with JUnit, Mockito & MockMvc — Udemy

PROJECTS

TodoApp, with Spring, Thymeleaf, MySQL — present

TodoApplication is a Spring Boot web application designed to facilitate task tracking for users. It features a responsive UI, secure authentication functionality, making it ideal for track personal progress.

MyEshoppers, with Spring, Thymeleaf, MySQL — present

Developed an e-commerce application using Java, HTML, and CSS. Implemented key features including user authentication, product browsing, shopping cart, order management, and an admin dashboard. The project is ongoing with recent updates focused on enhancing the README and overall project documentation.

Quiz System, using Java

Developed an interactive quiz application that allows admins to create and manage quizzes while students can attempt quizzes and receive grades. The system follows Object-Oriented Programming (OOP) principles and uses JSON files for data storage, eliminating the need for a database.

API Automation, using RestAssured & Postman

Implemented an API automation suite with RestAssured and Postman to validate endpoints and ensure data integrity for a financial platform, streamlining regression testing and improving defect detection.
